MELASAN - About us

We focus on the needs of modern society with its especially high level of stress and strain caused by today's lifestyle. Although we now live to become older than ever before, at the end of our lives they are not healthier than our ancestors thousands of years ago.

Especially in today's meriocratic society many people suffer from so-called diseases of civilization such as allergies, rheumatism, diabetes and cardiovascular diseases caused by stress, malnutrition (illnesses caused by an unbalanced diet or bad eating habits), nicotine and a sedentary lifestyle. Additionally, there are such symptoms as depressions, concentration- and sleep disorders caused by unexpected and profound changes in our private and work lives.

To counter the ill-effects caused in part by today's increasingly complex lifestyle we of MELASAN offer solutions that have proven to be effective in practice. More and more physicians and therapists use biological

compounds or orthomolecular medicine - which can have supporting and regenerating effects - instead of conventional therapies.

Especially to mothers and fathers it must be clear that they should not leave the responsibility for their children to others - particularly in questions of health!

Taking necessary steps to enhance and preserve our future health is now more than ever left to us! Therefore we of MELASAN manufacture our products on a predominantly natural basis as well as cosmetic preparations for health-conscious individuals.

In accordance with Austrian and EU-regulations MELASAN - dietary supplements are duly certified at the Federal Ministry as foodstuffs.

Since the legislator forbids statements that refer to any health effects of our products, we may not print data concerning dosage and effect on the label of our products.

We are a modern, fast-growing enterprise and are specialized in the production of biological compounds. MELASAN was created 1995 by Rudolf Koisser in Seekirchen, Austria. At present there are 30 employees at the new production location in Eugendorf, working in the departments of purchase, selling, production, shipping as well as in our laboratory.

The move to our new location of more than 4000 square meters in March 2002 was made necessary by to the rapid increase in orders of dietary supplements and the increased production due to the possibility of magistral preparation. This new space now offers suitable conditions for our products, which are handled according to highest quality criteria and strict requirements by law. To the greatest possible extent we process only natural and non - GM (genetically modified) substances.

Our raw materials can be supported with analysis certificates at any time and for many years we have maintained a very good contact to our suppliers from Europe and overseas. Approximately 80% of our production is destined for export, particularly to Germany, Spain, the Netherlands and other European Union states.

Because we are able to by our raw materials directly we gain a price advantage that we pass on to our customers. MELASAN places the well-being of its customers in the foreground and offers products in pharmacy-quality at a fair

price. We co-operate with physicians, therapists and pharmacies in all of Austria, Germany and Switzerland. At present the MELASAN brand offers:

- Dietary supplements
- Orthomolecular products
- Medical specialities and magistral preparations
- Essential and cold pressed vegetable oils
- Therapeutic cosmetic
- Herbal specialities

We offer manufacturing on a contract basis for established brands and advise and attend to our customers from the development of the prescription to the finished, bottled and labelled product.
